OUTDOOR BLINDS
& **SHUTTERS**

OUTDOOR BLIND COLLECTION

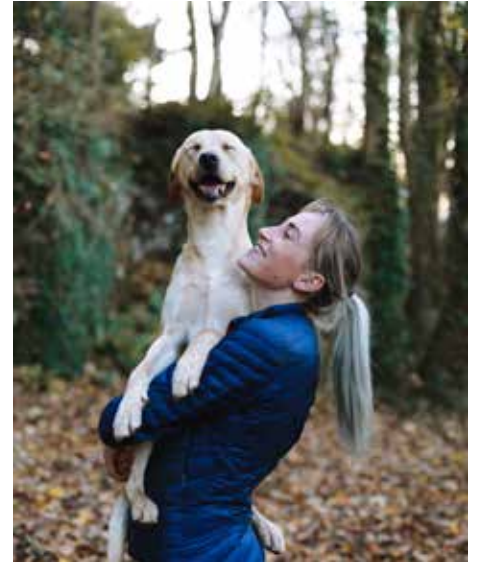

The Outdoor Blind is the modern alternative for enclosing your patio. The hi-tech fabrics are specifically formulated and manufactured to withstand the sun's harmful UV rays while protecting your furniture. Lower and raise the blind using a removable crank handle or motorise your blind. The Outdoor Blind will allow you maximum use of your external entertainment areas by stopping heat and glare and also providing a degree of weather protection while maintaining your view.

ALTRA SHUTTER COLLECTION

Altra Shutters allow for you to control light and privacy by tilting the adjustable slats. The Altra Aluminium Shutter is designed to simulate the appearance and clean lines of a timber plantation shutter, whilst delivering all the strength and benefits of an Aluminium shutter. The Altra Shutter's Aluminium construction provides key benefits in terms of weight, durability and allowing for the manufacture of wide panels.

FREE HANG BLINDS

Lower and raise the blind using a removable crank handle or motorise your blind. The blind is secured at the bottom using a choice of hold down clips, which allow the blind to remain down during windy weather.

Your Free Hang Blind can be complimented with a Recess Fascia or a Full Cassette to cover the top roll and mechanism.

You can also add a Wire Guide Kit or a Side Channel Kit to allow your Outdoor Blind to be operated easily in windy conditions.

Channel X Outdoor Blinds feature side channels to enclose the blind. This makes the blind safer to lift up and down, gives a complete wall to wall finish and provides for better insulation and weather protection.

Channel X Blinds can be secured at the bottom position (or at halfway if you wish) using a central turn knob that allows for maximum convenience.

WIDESCREEN BLINDS

Widescreen External Blinds provide seamless integration of indoor and outdoor entertaining areas. Not only do they ensure privacy and comfort, they're ideal for enclosing al fresco areas, offering protection from the elements.

Widescreen external blinds are retained in the side channel using a specially designed zip. This creates full wall to wall protection from wind, weather and pests while still allowing for ventilation through the screen fabric.

WideScreen with no Cassette

WideScreen with Cassette

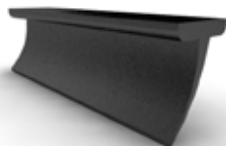

Available with a 150mm cassette or with open brackets.

WideScreen uses a 105mm tube to achieve widths up to 5.5m.

The fabric is retained inside the channel. This allows you to raise and lower the blind to any position.

The 25mm blade seal at the bottom of the blind compensates for uneven floors by providing a flexible bottom seal.

Reveal fix installations use a U channel to compensate for uneven openings.

The specially designed YKK Zip provides a secure retention system.

ALTRA HINGED SHUTTERS

Altra Hinged Shutters available in 1, 2, 3 and 4 panel configurations, will be the focal point of your Outside area. The Aluminium material is durable and easy to clean and is beautifully finished to simulate the elegance of a traditional timber plantation shutter. The Altra Hinged Shutter provides flexibility with good control over light and privacy.

- L And Z Frame available
- Hinged and Double Hinged models available
- 1, 2, 3 and 4 panel configurations
- Optional lock available

Two Panel Hinged

Four Panel Double Hinged

ALTRA FIXED PANEL SHUTTERS

The Altra Fixed panel is a static panel that cannot be opened or folded away. The Blades still tilt to open for views or privacy but the frames stay in place.

- Suitable as a divider or a privacy shield
- Can complement Hinged and Fold models
- Secure for external areas exposed to wind

Three Fixed Panels

Altra Fold Shutters consist of panels that are connected to each other and fold to the side. The Shutters fold away on a top and bottom track. Panels can be configured to stack to the left or right or be split. The Altra Fold is suitable for wider windows or openings.

- Stack to the left, right or split the stack
- 2,3,4,5,6,7 and 8 panel configurations
- Stainless steel components

Five Panel Fold. Left Stack

Eight Panel Fold. Split Stack
